Packaging and transport information
for Qcells solar modules

Scope of delivery

- Solar modules in box (as described below)
- 1× delivery receipt with specifications of pallet numbers (box IDs)
- 1× safety information
- 1× packing list with Module ID numbers on each box

Measured module current-voltage parameters ("flasher list") are sent parallel to the delivery per email.

The smallest handling unit is a completely filled transport box, as described below. A partially filled transport box will only be sent in special cases after prior agreement (may involve additional costs).

Truck specification and transit support

Qcells conducts pre-delivery check of all trucks. Generally, only trucks are approved for loading which are roadworthy and ready for operation. Qcells loads, stores and fastens the goods for transport. The carrier must approve of the safe storage. The load securing complies to the state of the art in accordance with the respective legal regulations (e.g. Road Traffic Act). The carrier must provide appropriate tools for securing the load. Trucks without appropriate equipment to secure the load will not be loaded and will be prohibited to transport the modules. For ecological reasons, Qcells always aspires a complete loading of the truck.
